

Beta Rev3 Exhaust Guard

Fitting and Care Instructions

Fitting

- Simply remove the 2 screws which secure the original guard in position and remove it.
- Make sure the silencer is clean.
- Fit the new guard, making sure to tuck the top tab under the mud guard.
Secure using the original screws.

Care and maintenance

- Before each use, check that the guard fits closely and securely to the silencer.
- Avoid cleaning with solvent based products.
- Avoid directly jet washing the labels.
- Periodically remove and clean behind the guard to prevent a build up of grit and mud from scratching the silencer.
